DETAILED ACTION

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 is directed to both of a system and a method, the system for evaluating and comparing golf club head designs and the method comprising the steps of creating a graphical model of a golf club head. It is not clear which invention this claim is referring to.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 - 7 are rejected under 102(b) as being anticipated by Naruo et al.

Regarding claims 1, 3 and 4, Naruo et al disclose an apparatus for selecting a shaft with an optimum flex for a golfer comprising an impact tester (See Col. 5, lines 1 – 6), a frame, a shaft 2 secured in a cantilevered manner to the frame, a golf club head mounting apparatus receiving a club head, deflection sensing means 20 emitting a voltage signal indicative of a sensed deflection, a processing unit 15 connected to the deflection sensing means to receive voltage signals and to

calculate shaft deflection and acceleration sensing means 31 with a meter 33 sensing an acceleration of the shaft and the processing unit being connected to the acceleration sensing means (See Col. 5, lines 54 – 67).

Regarding claim 2, the frame includes a vertical tube by which an impacting object 3 can be aimed and guided to impart a magnitude and location variable impacting force on the club head (See Col. 4, lines 19 – 28).

Regarding claim 5, the processing unit 15 includes a triggering device 23 to initiate data collection for the deflection and acceleration sensing means (See Col. 5, lines 58 – 64).

Regarding claims 6 and 7, a monitor 14 is connected to the processing unit 15 (See Col. 4, lines 33 – 39).

***Allowable Subject Matter***

5. Claim 8 is allowed.
